Leather Descriptions

Sierra Leather: Top grain leather with even coloration throughout the entire hide. Superior selection of Australian cattle hides are hand selected for Sierra. A gentle buffing and grain enhancement are applied to provide Sierra with a consistent grain structure through each hide and from hide to hide. Sierra is recognized industry-wide for its clean surfaces and excellent cutting yield.

Lena Leather: Full grain leather with even coloration throughout the entire hide, Superior selection of European and New Zealand cattle hides are hand selected for Lena. These hides are recognized industry-wide for their clean surfaces and excellent cutting yields. Luxurious, soft hand and smooth supple surface make this one of the most beautiful leathers available.

Vulcano Leather: Combines distressed leather aesthetics with the durability of modern tanning. Hand-selected European and New Zealand hides are aniline dyed with a classic marbled crackle effect. A protective non-scratch finish allows use in high-traffic areas and makes Vulcano suitable for public and private environments.

Fabian Leather: Fabian is a full grain leather produced in the Verde valley region of Italy. This aniline dyed leather features a random hand applied two tone tipped grain effect and luxurious soft hand. Only the finest European hides are hand selected for Fabian, assuring clean surfaces and high-quality cutting yields. With its durable protective finish, this leather is suitable for hospitality, contract, aviation and luxury residential environments.

Windsor Leather: Full grain leather with two tone coloration. The visual effect is applied by local artisans using a traditional hand wiping method combined with a secondary finish applied mechanically. Only a superior selection of New Zealand cattle hides are used for Windsor. Luxurious soft hand and smooth supple surface make this leather the perfect choice for any classic or contemporary setting. A light top coat is applied to provide protection and makes this leather suitable for most residential, contract and hospitality environments.

Environmental Commitment

Green Hides leather production is REACH (EC 1907/2008) compliant with aims to improve the protection of human environmental health. Processed using low emission mineral tanning formulas which are environmentally respectful, the hides are retanned in aged oak drums using vegetable agents, natural fat liquors, oils and dyes that ensure the leather is properly thoroughly dyed. Natural color variations may occur even within the same dye lot.

Cleaning Codes

L: Warm water, mild soap only. Absolutely NO alcohol-based cleaning agents. Dust regularly. Minor spots can be washed off using lukewarm water and mild soap. Do not soak. Never clean with abrasive solvents, alcohol or wax-based products.

BC: Bleach Cleanable. Bleach cleanability is desirable for any leather that may need to be disinfected or sterilized. Use a 10:1 water to bleach solution for Sierra, Vulcano and Fabian leathers and a 48:1 water to bleach solution for Lena and Windsor leather.

Green Hides Sierra, Lena, Vulcano, Fabian and Windsor leathers meet the BIFMA HCF 8, 1-2019 Healthcare Furniture Design Guidelines for Cleanability.
